

ICS 4U1/3 5 Client Contract

This is a commitment between your company and your client. You must look at the project requirements focussing on your particular program and determine what features etc. will be part of your final submission.

Client Contract

May 12

Each Team must submit in writing a contract of their proposed database for approval by **Monday May 12**.

It must include the following:

- team name and logo
- client name and position
- proposed software title
- the team leader and team rep names
- signatures and date areas for the client and team leader on behalf of the entire team

It must include details based on the following headings:

- required features (as found in 2 Term Project Requirements 2014)
- potential updates
- commitment to complete all project requirements and due dates

There can be no project duplication within or between the course sections!

The Client Contract will be printed, signed and dated by all team members and the client. Hand it in.

Drop a final electronic version as well.
